## Welcome to Vintage Ledlight!

Vintage Ledlight, a Belgian family business, is a well-known LED product manufacturer. Where high-end brands stop, Vintage Ledlight takes things even further. Leveraging our 35 years of experience in the lighting sector, we started developing products that, in our opinion, did not yet have true LED equivalents.

With many people sharing our opinion, Vintage Ledlight soon became successful.

Since then, we've created a unique and broad range of LED alternatives to legacy lighting products.

Vintage Ledlight also stands out from the competition with its high-quality offering, a CRI of +80 and +90, a 3-year warranty, and a selection of colour temperatures: 2000°, 2200°, 2300°, 2500°, 2700° and 3000°. In addition, our lamps are perfectly dimmable and are gradually being made FlickerFree.

Lighting is our core business and our passion, and we constantly strive to update and improve our products. Almost any existing lamp can be replaced by an LED alternative, helping you lower your energy consumption.

In 2020, Vintage Ledlight celebrates its fifth anniversary, and the brand is now distributed in five countries. Feel free to consult our regularly updated website, as it may serve as a source of inspiration for your projects.

# CORD DIMMER

## VIN 0043

Cord dimmer T1, Black

3-35W LED rated power  
7-110W Rated power  
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps  
When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum brightness to optimize dimming behavior.
