

The image features three modern, conical pendant lamps. Each lamp is made of a material with a fine, vertical ribbed texture, giving it a sculptural appearance. They are illuminated from within, creating a warm, golden-brown glow that contrasts with the dark, muted background. The lamps are arranged in a staggered, overlapping fashion, with one in the foreground and two slightly behind it. The overall aesthetic is minimalist and contemporary.

Array

Design by Umut Yamac

Array

A striking pendant of impressive proportions, Array is an exploration of thread and its potential to create lightweight and dynamic sculptures of light.

ARRAY

Composed of an array of fine technical threads pulled taut between two aluminum rings, Array presents a wide range of conical and cylindrical silhouettes that can be combined together to form a compelling installation.

The spacing distribution of the threads creates translucency and volume, whilst the layering effect gives the illusion of movement. Suspended overhead, Array emits a pleasant downlight projected from an invisible source concealed within the lower ring.

At the same time, indirect light washes upwards in a gradient of colour, enveloping rather than invading the space it occupies.
